***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended for format as follows:

**For abstract**

-- Deleting the title "Automated Method for identifying landmarks within an image of the brain" in line 2 of page labeled 24.

-- Deleting [Fig. 1] in the line 15 of page labeled 24.

***Examiner's Statement***

2. The amendments filed on 8/27/2009 overcome the following set forth in the previous Office Action:

- the drawings being objected;
- the incorporation of essential material in the specification by reference to an unpublished U.S. application, foreign application or patent, or to a publication being improper;
- Claims 1-21 being rejected under 35 U.S.C. 112, second paragraph;
- all rejections based on the cited prior art.

3. For Claims 1-20 being rejected under 35 U.S.C. 101, the Examiner reconsidered them and concluded that the amended claims inherently require a machine for their implementation. Claims 1-20 are not rejected under 35 U.S.C. 101 anymore.

*Examiner's Statement of Reasons for Allowance*

4. Claims 6 and 13 are canceled by the applicants.

5. Claims 1-5, 7-12, and 14-21 (now renumbered as 1-19, respectively) are allowed.

The following is an examiner's statement of reasons for allowance. The prior art fails to teach the method of Claim 1 and the system of Claim 21 which specifically comprise the following features in combination with other recited limitations:

-- (b) binarising the plane of the MR image into foreground and background voxels based on at least one threshold selected using anatomical knowledge, **the threshold being selected by maximizing a function which is a sum of variances of voxel intensities below and above the threshold;**

-- (c) identifying a set of object voxels from the foreground voxels, the set of object voxels being formed by a sub-step of **excluding from the foreground voxels a plurality of voxels which were only classified as foreground voxels** due to proximity of cortical and non-cortical structures;

-- (d) **identifying and restoring object voxels lost during the excluding sub-step of step (c), the restored object voxels being: object voxels located far from the skull, and lost due to the morphological opening operation(s); object voxels located around the**

**boundaries of the object, and lost due to the morphological opening operation(s); and  
object voxels lost due to the partial volume effect.**

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
